

Project Sustainable Procurement Policy

Our Commitment

Our commitment is to construct infrastructure that is led by a sustainable procurement framework. Our goal is to provide sustainable procurement outcomes building on the JCG JV Environment and Sustainability Policy. This Policy aligns with ISO2400:2017 Sustainable Procurement – Guidance, and the Sydney Metro West Sustainability Plan.

Our approach

JCG's core values are the platform for our everyday interactions and with our minimum standards guide, our approach to environment and sustainability.

Ownership

We gain trust through action by:

- Integrating environmentally, socially, and economically responsible sourcing and governance factors into the projects operating and procurement processes.
- Monitoring key supply chain partners by requiring partners to periodically report against sustainability performance metrics and record compliance with project requirements.

Respect

We care deeply about what we do and how it affects people's wellbeing by:

- Where possible, procure services and materials locally to reduce transport emissions, support local businesses and provide jobs and upskilling of the local labour forces.
- Seeking compliance with all relevant laws and regulations including the Modern Slavery Act 2018, the International Labour Organization's Fundamental Contentions and the "Ten Principles" of the UN Global Compact

Collaboration

We're in it for the long, long term by:

- Seeking opportunities to collaborate with the supply chain to drive innovation and create mutual value.
- Ensuring sustainability is considered in the supplier selection process.
- Providing sustainability training to High Impact Suppliers.
- Encouraging coordination and information sharing between construction teams to enable the 'whole picture' to be presented to stakeholders.

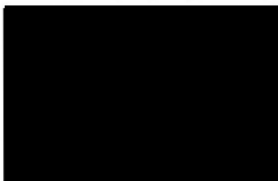

Passion

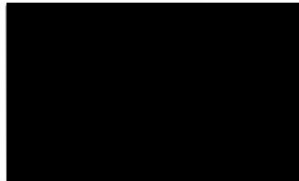

We push the boundaries by:

- Informing potential suppliers of the Project's sustainability requirements and embed sustainable procurement requirements into contract documents.
- Embedding initiatives aimed at improving participation of local businesses and small and medium enterprises (SME) in the Workforce Development and Industry Participation Strategy
- Encouraging, recognise, and reward initiatives and innovations that achieve the best sustainability outcomes and drive positive change in the supply chain.

This Policy is consistent with John Holland, CPB Contractors and Ghella policies. The Project Director, Commercial Director and Environment, Approvals & Sustainability Director will be responsible for upholding this policy and embedding environmental and sustainability requirements into the project. All employees and third parties engaged by JCG will be required to abide by this Policy and the associated processes.
